

# HERRMANN EQUIPMENT, INC. AND R.J. NOBLE COMPANY

**Above:** R.J. Noble Company utilizing their Bomag "Cedarapids" CR552 paving machine on a public works street project in Mission Viejo.

The R.J. Noble Company is a Class A, General Engineering Contractor specializing in grading and asphalt paving, subcontracting underground, electrical and concrete work. Presently the company operates two large asphalt plants, including a rock quarry, a rock-crushing plant, and a recrush operation onsite. RJNC has been in the asphalt industry since 1950 and they have built a solid foundation and reputation. They have been doing business with Herrmann Equipment for over 20 of those years. It's been a great partnership and R. J. Noble Company has purchased 11 asphalt pavers through the years."

They recently purchased two Bomag "Cedarapids" CR552 models, the one pictured above and one that they are waiting to be delivered. Chuck Spiers, RJNC general superintendent comments, "We purchase Bomag Cedarapids CR552 paving machines because they are for mainline paving applications such as airports, interstates, highways and roads all while meeting our stringent Tier 4 emissions standards. We love the productivity and reliability of the Bomag "Cedarapids" CR552 machines. Our operators appreciate the unique swinging control console and excellent visibility. The 16.7-ton hopper holds maximum material and the frame raise system and proportional steering give us incredible maneuverability."

Spiers adds, "Our decision to partner with Herrmann Equipment and Bomag Cedarapids is mainly due to their tremendous customer service and support. The personable response you get from their team is bar none in the industry. You just don't see this kind of hands-on service any more. Mike Allen from Herrmann Equipment will answer his phone 24/7. He will trouble shoot an issue over the phone in the middle of the night and will come out to the jobsite if needed." RJ Noble Company and Herrmann Equipment have a long history of succeeding together and many more years to come.
